

Hopewell Lodge Rhododendron Garden Bank..... mostly Cunningham White and many hardy Hybrids ...600 ft NE Scotland Nr Royal Deeside.....large collection in farm woodlands started 25 years ago..... my passion.

Hopewell Farms is a 550 acre family farm situated between the rivers Dee and the Don in Aberdeenshire. Comprising good fertile loam soil on some undulating upland and quite exposed farmland at about 600 ft with a rainfall of only about 25 inches a year.

My policy is now almost entirely environmental and conservation and amenity are the prime objectives, resulting in a hugely transformed landscape and a beautiful property.

Water features, extensive wildlife corridor hedges, highly managed woodland copses and arboretum and about 800 Rhododendrons planted over the past 25 years in mostly woodland and garden settings. Colour, landscaping, good taste and beauty are my passions and my Rhododendron Collection and research are together improving the overall scene for ones immense pleasure and a wonderful wildlife Habitat and Legacy for the future and for all to appreciate

Anthony de Winton

Hopewell , Tarland.interested visitors and fellow enthusiasts are most welcome.....
